Eskay Construction Technology is a distinguished name in the realm of Structural Repair and Construction. Founded by **Mr. Omkar S. Kale**, a Civil Engineering graduate (BE-Civil Engineering) from Mumbai University and also with a Diploma in Structural Engineering, and guided by **Mr. Sanju R. Kale**, the proprietor of **Eskay Applicators**.

Our company stands as a testament to decades of industry expertise. In response to the evolving landscape of construction and rehabilitation industries.

Eskay Construction Technology emerges as a proactive entity, leveraging advanced and improved technologies. Collaborating with renowned construction chemical manufacturing companies, we consistently undergo training to master the application of cutting-edge products.

Our proficiency extends beyond conventional practices; we excel in corrosion treatment, addressing both post-wear-and-tear scenarios and implementing preventive measures during the initial stages of work.

Specializing in retrofitting older structures, we employ a range of materials, including E-glass Fiber, Carbon fiber, polymer-modified mortars, and more.

Eskay Construction Technology is synonymous with quality buildings, incorporating external repairs executed by our expertly trained and skilled labor force recognizing the significance of tasks such as sandblasting for RCC/steel structures, bridges, aqueducts, and jetties.

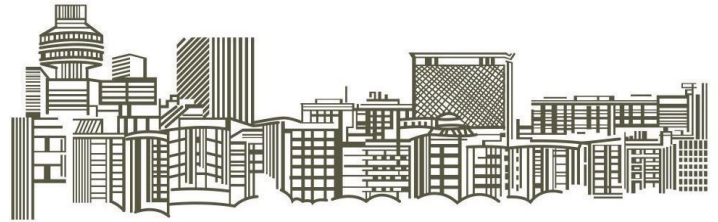

We bring our wealth of experience to each project. Whether it's the restoration of existing structures or the innovative construction of new buildings using diverse technologies, we at Eskay Construction Technology are committed to excellence, integrity, and staying at the forefront of industry advancements.

ESKAY CONSTRUCTION TECHNOLOGY.

LIST OF HUMAN RESOURCES

SR. NO.	DESCRIPTION	NOS
1	Male Helpers	120
2	Female – Helpers	25
3	Skilled Masons	30
4	Unskilled Masons	18
5	Plumber	6
6	Carpenter	4
7	Painter	25
8	Welder	2

Note:

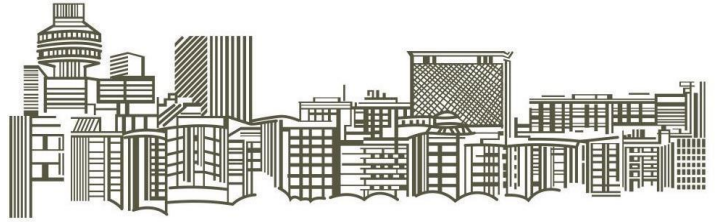

Number of workers as per requirement of the project.

LIST OF PLANTS & MACHINERY

Sr. No.	Equipments & Construction Aids	NOS
1	Concrete Breaker	8
2	Plaster Breaker	12
3	Drilling Equipment	6
4	Steel Scaffolding	5000 Sq. Mtr
5	Props	2000 Sq. Mtr
6	Bamboo Scaffolding	10000 Sq. Mtr
7	Vibrators	4
8	Plastering Tray	36
9	Grouting Machine	8
10	Epoxy gun	12
11	Silicon gun	6
12	Cutter machine	8

Note:

Number of tools and machinery as per requirement of the project.

OUR SERVICES

Structural Strengthening/Repair Work:

With injection grouting, cement grouting, PU grouting, micro fine cement grouting, glass/carbon fiber wrapping, spray polymer, micro concrete jacketing, polymer modified mortar, epoxy mortar, sacrificial anode, sand/grit/copper slag blasting, strengthening work is undertaken.

Construction Work:

Construction sites such as residential and commercial buildings, educational/research institutes, hospitals, bridges, jetties, aqueducts etc. are built. Also redevelopment/rehabilitation work is our forte.

Waterproofing Work:

We are specialized in conventional waterproofing, light-weight waterproofing, polymer waterproofing, PU waterproofing and membrane waterproofing.

Interior Designing:

We help you design and decorate your flats, offices and Bungalows.

Painting Work:

We are skilled professionals when it comes to painting. We work with elastomeric coating, polyurethane coating, heat reflective coating, epoxy coating, anti- carbonation coating, etc.

Floor Work:

It includes tremix flooring, polyurethane flooring, epoxy flooring, industrial concrete flooring, stamped concrete flooring and paver blocks flooring.

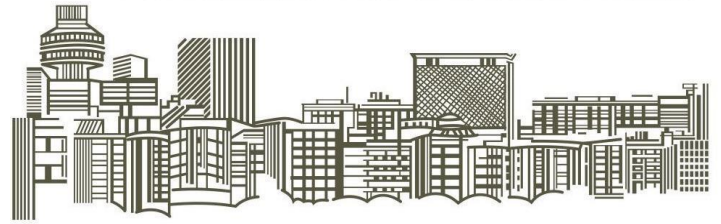

Plumbing/Electrical Work:

We assist in plumbing work of any residential/commercial block. Also we work on contracts of electrical circuits of any given building plots.

WHY CHOOSE ESKAY CONSTRUCTION TECHNOLOGY.?

- **Decades of Expertise:**With over two decades of rich experience, Eskay Construction Technology has honed its skills in working with diverse construction chemicals. From waterproofing admixtures to polymer latex, we bring a wealth of knowledge to every project.
- **Chemical Prowess:** Our expertise encompasses a range of construction chemicals, including those for waterproofing, plasticizers for water reduction in cement ratios, polymer modified mortar, migratory corrosion inhibitors, and anti-corrosive treatments for challenging conditions in industries, bridges, dams, jetties, and aqueducts.
- **Surface Preparation Excellence:**Recognizing the significance of surface preparation in both repairs and new constructions, we ensure meticulous attention to detail for optimal project outcomes.
- **Timely Execution:**We understand the critical time interval between sandblasting and the application of various coating systems, emphasizing efficiency and timely project delivery.
- **Proficient Team:**Eskay Construction Technology boasts a team of proficient members dedicated to maintaining high scrutiny levels throughout the construction and rehabilitation processes.
- **Curing Know-How:**Our in-depth understanding of curing processes, including the setting time after adding retarder and accelerator, sets us apart. We know where and how to apply free-flow grouts in foundations and flooring, ensuring structural integrity. Choose Eskay Construction Technology for a blend of seasoned experience, chemical expertise, and a commitment to excellence in every construction and rehabilitation project.
